So I believed of updating my thunderbolt 3 control But when I looked under 'USB Controller' at the Gadget manager there has been no information about thunderbolt 3 control just on 'Apple company USB XComposite Gadget', 'Intel Ur eXtensible-Hostcontroller.. Hi everyone, I'm having problems with hotplugging my egpu set up (+ GTX 960) in earn 10.. Everytime i plug it in I'michael getting a bluescreen When I plug in the egpu set up during win 10 shoe process, everything functions good.
